DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 1, 6-8, and 10-11 rejected under 35 U.S.C. 103(a) as being unpatentable over Ferraris et al. (US 20030022883) in view of Haile et al. (US 2002/0132960). The claims are reasonably and broadly construed in light of the accompanying specification, to be disclosed by Ferraris as comprising:

a process for drying or concentrating in a polar solvent solution comprising submitting said solution to microwaves for a period to reduce polar solvent concentration from said solution (paragraphs [0118], [0130], [0399], and [0543]). Ferraris discloses the claimed invention, except for the specific times, polymers, and degradation levels. It would have been an obvious matter of design choice to recite those specific values, since the teachings of Ferraris will perform the invention as claimed, regardless of the specific times, polymers, and degradation levels. Furthermore, Ferraris discloses the claimed invention, except for the claimed polyhydroxyalkanoate (PHA). Haile, another process for drying or concentrating, discloses that feature at paragraphs [0106]-[0108]. It would have been obvious to one skilled in the art to combine the teachings of Ferraris, with the polyhydroxyalkanoate (PHA) for the purpose of effectively using microwave energy in a wide variety of materials, energy levels, and/or frequencies.

Conclusion

Other prior art references cited with this action can be used to reject the claimed invention, but are not relied upon in this action.
